

Notice on HSTVision Inc. a Wholly-Owned Subsidiary

We are pleased to announce that NanoSystem Solutions, Inc. has acquired all shares of HSTVision Inc. and made it a wholly owned subsidiary as of 5th August, 2024.

HSTVision Inc.(HST) has been developing its business based on its outstanding technology as a specialized manufacturer of image processing for semiconductor manufacturing equipment and machine vision for electronic component mounting and inspection equipment. They have also been selling products that combine HST's image processing technology with our optical measurement and inspection technology.

HST's image processing software technology for the semiconductor and electronics industries will not only enable us to quickly bring new equipment and system products to market by combining it with our optical application hardware technology, but also to differentiate our products through collaboration with the various image processing technologies of our parent company, V-Technology Corporation, and its group companies. In addition, we expect to be able to differentiate our products through collaboration with the various image processing technologies of our parent company, V-Technology Corporation, and other group companies.

As we seek to expand our semiconductor production equipment-related business, we are confident that by adding HST to our group, we will be able to meet the expectations and trust of our customers by accelerating collaboration in the development of various inspection technologies, responding to various inquiries, and providing prompt and innovative solutions.

We look forward to your continued patronage and support.
